. **Foot On Shoes** — This website used for buy product
<https://fos.co.in/>

. **Task Manager – Employee Task Management System**

Description:

Developed a task management web application designed for use within companies to **assign and monitor employee tasks** efficiently.

Employers can **create, update, and track tasks** for each employee, while employees can **view their assigned work, update progress, and mark tasks as completed**.

The platform improves **team productivity and workflow transparency** by centralizing task tracking and communication. Included **role-based access control** to differentiate between employer and employee functionalities.

. **RCM Landing** — This website used for buy meditation

. **Mozimo** — This website is chocolates ecommerce website. To purchase owner also admin changes it's items.

. **BMG – E-commerce & Auction Platform (Buyer**

Developed an e-commerce platform allowing users to **buy products directly or bid in live auctions**.

Implemented two purchase flows —

- **Buy Now:** Instant product purchase.
- **Auction System:** Users place bids until auction end; highest bidder receives an **email notification** and completes payment via **card integration**.
Built **real-time chat** using **WebSockets** for smooth communication and integrated **Redux** for managing large-scale data flow.
Integrated **secure payment gateway** for transactions.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Redux, WebSockets, Stripe API

. **BMG Seller – Product & Auction Management Platform**

Created a platform for sellers to **manage products** and monitor **buyers' bidding activity** in real time.

Sellers can list new products for direct purchase or auction, with built-in

fairness logic to hide their own listings if they register as buyers.
Implemented **real-time bid tracking** and **chat system** using **WebSockets**, with **Redux** for global state management across complex workflows.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Redux, WebSockets

. PADEL – User & Admin Booking Platform

Description:

Developed a full-stack web application for **Padel court booking management**.

Admins can **create and manage slots**, handle schedules, and process payments, while users can **view availability, book courts, and pay online**.

Integrated multiple payment gateways like **Stripe, PayPal, and Google Pay** for seamless transactions.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Stripe API, PayPal API, Google Pay API
